Appendix C-4 — Land Trusts

Land Trusts: NATIONAL

NAME / ADDRESS PHONE / CONTACT	PURPOSE	OTHER
American Farmland Trust 1920 N Street, NW Washington, D.C. 20036 (202) 659-5170 Dennis Bidwell	To work with farmers, business people, legislators, and conservationists to encourage sound farming practices and preserves America's most critical agricultural resources. Provide advice to landowners on ways to include conservation strategies in land-use and estate plans for farmers, and they accept donations of land and conservation easements for conservation purposes. Administers the Farm Legacy Program.	WA area of operation: statewide Main land types: agricultural lands (may include wetlands).
Land Trust Alliance of the Northwest 3517 NE 45 th St. Seattle, WA 98105 (206) 522-3134 Elizabeth Bell	The regional branch of this national organization of local and regional land trusts. The Trust's mission is to strengthen the land trust movement and help land trusts save land by providing information and education, fostering supportive public policies, and building public awareness of land trusts and their goals. Publishes the quarterly newsletter called the Exchange. They also publish many books and brochures on land saving approaches.	WA area of operation: statewide
River Network P.O. Box 8787 Portland, OR 97207 (503) 241-3508 (800) 423-6747	River Network helps people organize to protect and restore rivers and watersheds. They support river and watershed advocates at the local, state, and regional level, helping them to build effective organizations and work together. They also acquire and conserve riverlands that are critical to the services rivers perform for human communities: floodplain management, fish and wildlife habitat, recreation and open space. In the Northwest, River Network has acquired over 20,000 acres on the Skagit, Stillaguamish, and other outstanding rivers.	WA area of operation: statewide
The Nature Conservancy Washington Office 217 Pine Street, Ste 1100 Seattle, WA 98101 (206) 343-4344 Curt Soper	TNC is an international, non-profit, science-based, membership organization whose mission is to preserve the best examples of communities, eco-systems, and endangered species representing the diversity of life on Earth. The Conservancy owns and manages the world's largest system of private nature sanctuaries, including more than 30 preserves in Washington. TNC provides information on the identification, protection, and stewardship of natural areas. They often work in partnerships with public agencies and private organizations to identify, secure, and manage significant natural lands.	Primary conservation methods: all land acquisition tools including donation, purchase, and easement as well as cooperative stewardship projects with public and private landowners. WA area of operation: statewide
Trust for Public Land Washington Office 506 Second Ave, Ste 1510 Seattle, WA 98104 (206) 587-2447 Craig Lee	TPL is a national non-profit land conservation organization dedicated to conserving land for people to enjoy as parks, community gardens, recreational and natural areas. It is a problem solving organization that helps communities, public agencies, and non-profit groups acquire and protect open space for public use. They often work as a quick response transfer agent, negotiating donations and/or land transfers from landowner, to TPL, or to government agency for permanent stewardship.	WA area of operation: statewide Main land types: desirable open land

Land Trusts: REGIONAL

NAME / ADDRESS PHONE / CONTACT	PURPOSE	OTHER
Mountains to Sound Greenway 506 Second Ave, Ste 1502 Seattle, WA 98104 (206) 382-5565		
Pacific Forest Trust P.O. Box 4035 157 Yesler Way, Suite 519 Seattle, WA 98104 (206) 292-4747 Donald J. Duprey Field Director	To enhance, restore and preserve the productive private forestlands of the Pacific Northwest; dedicated to preserving working forests; maintain a center for stewardship forestry and a policy center developing incentives for stewardship forestry.	Area of operation: Pacific Northwest, primarily Washington. Main land types: ecosystems, forests, mountains, water quality, watersheds, wildlife habitat Main land protection methods: land donations, easement donations, purchase easements
Rocky Mountain Elk Foundation P.O. Box 8249 Missoula, MT 59807 (406) 523-4500 Thomas Woodruff Lands Program Manager	Ensure the future of elk and other wildlife by conserving, restoring and enhancing natural habitat.	Area of protection: Western United States Main land types: ecosystems, forests, open space, mountains, ranches, recreation, wildlife habitat Main land protection methods: land purchase, easement donations, land exchanges, option agreements, right of first refusal, lease land to others

* Contents provided by the Land Trust Alliance

Appendix D — Worksheet

Assessing Stewardship Needs

Identify the Needs of the Landowner

1. Conservation Interest:
 - What are the owner's conservation interests for the wetlands?
 - Do they want to permanently protect the wetland?
2. Owning and Living-On:
 - Does the landowner wish to continue owning the property?
 - What is the owner's and family's interest in living on the property?
3. Economic Needs:
 - What is the owner's interest or ability to carry costs of owning and managing the property and its wetlands?
 - What are the owner's estate planning interests?
 - What is the owner's interest in reducing future tax liabilities?
 - What is the landowner's need for economic return or compensation from the property? Do they need to cost-share?
4. Land-Use Activities:
 - What activities does the owner desire to have on the property?
 - Will public use be compatible with the landowner's wishes?
 - Will extractive uses (logging, fishing, mining, grazing, etc) be permitted?
 - What is the owner's desire to develop the property?
5. Problems:
 - Are there management problems like water quality, flooding, erosion, etc. that need to be addressed?
 - Any legal limitations on the property such as existing deed restrictions, management agreements, etc.? What permits might be needed?
6. Other Needs:
 - Are there other special needs to be considered?
 - Is there more than one owner of the wetland?

Evaluate the Wetland on the Property

1. Wetland Type and amount:
 - What types of wetlands (forested wetlands, marshes, bogs) are present?
 - What percentage of the property is wetlands?
 - What is the water source for the wetland?
2. Wetland Functions:
 - What functions do they provide? (protect shorelines, aquifer recharge sites, flood attenuation, historic or culturally important areas, habitat values, endangered or threatened species, etc.)
3. Wetland Condition:
 - What is wetland's condition?
 - Does the property have farmed wetlands or drained historic wetlands that could be enhanced or restored?
 - Can the property be developed without degrading the wetlands?
4. Wetland Sustainability:
 - What are the upland influences on the wetland?
 - How much of the property must be "protected" to maintain the natural features and their functions?
 - What management, restoration, or preservation actions will benefit the wetland's long term sustainability?

Evaluate the Property in the Context of Basin/Watershed Activities

1. Basin/Watershed Context:
 - What are the land ownership patterns and presence of protected open space?
 - What are the known resource problems within the basin/watershed, such as salmon decline, flooding, water quality, sedimentation, habitat loss, etc., and how does the wetland contribute to addressing them?
 - What are the significant characteristics of the general area near the property for their contribution to conservation within the watershed, or their suitability for development?
2. Land Use:
 - What are the land use trends and associated indicators of change, such as locations of Urban Growth boundaries and established infrastructure?
 - What are the current zoning and other land use regulations affecting wetlands?
3. Opportunities:
 - What are the real estate market conditions (consideration of wetland amenities in property values)?
 - What are the local government stewardship programs such as: open space preservation and current use property taxation?
